

# URBAN STORMWATER & STREAM FUNCTION FOR PLANNERS

## WHO IS THIS FOR

Anyone interested in the nexus between stormwater, urban streams, land planning, design, and the development process.

## WHY SHOULD YOU ATTEND

This two day webinar series is a accelerated version of the Stream Management Academy that aims to introduce urban planning professionals, engineers, landscape architects, ecologists, or anyone interested in stormwater systems to the broad aspects of watershed and stream function. The goal of the webinar series is to introduce the elements of a healthy stream, integrating runoff reducing practices, and the implementation of higher functioning lower maintenance urban stream designs/ stormwater infrastructure into land use decisions, planning, design, construction, and maintenance.
